

Searching for Plans Using the New TransPI Search Utility

****External****

Launching TransPI:

TransPI can be launched by using the TransPI icon on the GDOT Web Page (www.dot.ga.gov) or from the link on the Historical Plans Research web page (<http://www.dot.ga.gov/doingbusiness/research/Pages/RoadDesignSearch.aspx>).

Using the TransPI Searches:

There are some common operations when using the new TransPI searches. You will notice that in the searches, there are operators that must be specified. Two of the most common are as follows:

Equals – The search criteria must be exactly as it appears in TransPI

Example: The user enters a PI number of *123456*. The data entry in TransPI must be *123456* or it will not find the project. In this case, the PI number must be seven digits, so the user would actually need to enter *123456-* for the search to return the project.

Contains – The search criteria should contain all or part of the entered value

Example: If the user entered the same value of *123456* above and selected the “*Contains*” operator, it would have returned the desired project since the value entered is contained within the correct PI number of *123456-*.

TransPI Search Options:

Two examples of searching using TransPI are shown below, but these are just two examples. Any combination of searches can be done and all projects meeting the search criteria will be returned. From there, further filtering can be done to obtain the plans you desire.

Example #1:

Searching for plans for project PI Number 0001358

a) Enter the desired **Project ID** (PI #) and click on **Go!**

County	<input type="text" value="Equals"/>	<input type="text" value="-Select One-"/>
Keyword	<input type="text" value="Contains"/>	<input type="text"/>
Project ID	<input type="text" value="Contains"/>	<input type="text" value="0001358"/>

Downloading Plans from TransPI:

There are two options to download plans based on the number of sheets desired.

- a) For a large number of sheets: Use the Download as Zip feature
- i. Click the checkbox next to the sheets that you need to download and stamp.
Sheets can be selected from as many sections as required.

- ii. Once all the sheets have been selected, right-click and select the **Download as Zip** feature.

n

Based on your ZIP utility, you would then save the file and extract it on your computer.

- b) For a small number of sheets, use the *Save a Copy* feature in Adobe.
